SHALINI SINGH

Programmer Analyst

OBJECTIVE

Targeting opportunities as a Salesforce Developer and Java Full Stack to leverage expertise in developing innovative solutions. My current goal is to apply my knowledge to real-world projects.

Preferred Location: Pune, Hyderabad, Bangalore

PROFILE SUMMARY

- Utilized **nearly 2 years** of hands-on experience in the IT sector, specializing in Salesforce Development at Cognizant.
- Engaged as a Salesforce Developer, dedicated to honing expertise in the LWC framework and elevating project development standards.
- Attained proficiency in Salesforce by obtaining the Salesforce Certified Administrator and Salesforce Certified Platform Developer credentials.

WORK EXPERIENCE

Programmer Analyst, Cognizant Tech. Solutions, Kolkata | Sep'22 – Present

Responsibilities:

- Spearheading Salesforce projects, optimizing processes, and collaborating on cybersecurity solutions, driving operational efficiency and data protection measures to ensure project success.
- Collaborating with cross-functional teams to design and implement innovative solutions.
- Conducting in-depth analysis to optimize Salesforce processes and enhance user experience.
- Providing technical expertise in Lightning Web Components (LWC).
- Managing data integration and customization using Salesforce tools.
- Focused improving my knowledge of development using Java, Spring Boot, Microservice & working on internal project works.
- Work with Java Spring Boot framework to develop API for project Payment360.

INTERNSHIP

EAS Salesforce Intern, Cognizant, Kolkata | Mar'22 – Aug'22

Description:

- Worked on Salesforce Aura framework, enhanced functionalities, collaborated with senior developers, and earned 141 badges in Trailblazer.
- Contributed to project planning and execution, developed custom objects, and provided technical support.
- Dedicated to continuous learning, resolved technical challenges, ensured timely delivery, and fostered a collaborative work environment.

PROJECTS

PG Booking Platform | 2022

Description:

- Custom objects, fields, and page layouts are utilized to tailor Salesforce for PG search, enhancing user experience and efficiency.
- Lightning Component Aura and SOQL are employed to create a dynamic and interactive platform for users to access PG details seamlessly.

Portfolio | 2024

Description:

- This application is about keeping a record of all projects within a resume, using LWC, API integration, styling hooks, data modeling.

Payment 360 | 2023 - Present

Description:

- Integrated Payment Application using Spring Boot Framework.
